Resume

Full Name: Koduri Venkata Sri Rishitha

Current Title: BTech 2nd year Student

Location:
Hyderabad

Email:
rishitha.koduri@gmail.com

Phone:
+91 8639536300

Summary

I am a second-year Computer Science student at Keshav Memorial Institute of Technology (KMIT) with a strong curiosity for understanding how technology works behind the scenes. I enjoy learning through hands-on projects, exploring system architecture step by step, and continuously building my technical and problem-solving skills.

Core skills

Programming languages	• Python • Java • JavaScript • MySQL • C • C++ • HTML
Machine Learning	• Expertise on **Machine Learning models** including Linear Regression, Logistic Regression, Decision Tree, Random Forest, and Clustering techniques • Hands-on experience with Regression, Classification, and Clustering algorithms • Knowledge of Deep Learning models, Transformer Architecture, and Attention Mechanisms
Communication & Languages	• Excellent communication and articulation skills • Strong Verbal and interpersonal communication • Fluent in the languages English, Hindi and Telugu • French-Beginner proficiency (Currently learning)
Tools and Technologies	• PyTorch • React.js • VS Code • SQL • Jupyter Notebook • Git and GitHub

Education

Dates	Role & company	Academic achievements
2024 – Present	Keshav Memorial Institute of Technology (Current), Hyderabad	• Current CGPA: 7.64/10 • Completed 3 semesters successfully • Built academic projects in Python, Machine Learning and Deep Learning • Developed Transformer-based model using PyTorch.
2022–2024	Narayana Junior College, Hyderabad	• Secured 82.5% • Strong performance in Mathematics and Science-related subjects.
2012-2022	Meridian School, Hyderabad	• Secured 87.67% in CBSE CLASS X • Scored 93 in Artificial Intelligence. • Consistent academic performance across core subjects

Projects

ABFormer – Transformer based deep learning model	• Implemented PyTorch-based model architecture development and training workflows • Applied concepts of Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN), and Transformer models • Explored antibody–antigen interaction modeling • Integrated multimodal datasets into a single predictive framework • Designed an end-to-end pipeline covering preprocessing, training, validation, and inference
SmartEats- A food delivery application	• Developed a full-stack food delivery application using React.js • Designed an interactive and responsive front-end user interface • Explored concepts of full-stack development, API integration, and state management
Technical experience	• Serving as a member of the Tech Team, Fashion Club, contributing to development tasks using **Flask.** • Available on **https://github.com/Rishitha3-24/RITI-TECH**

Extracurricular Activities

- Model United Nations (MUN) - Participated in policy debates, collaborated with delegates, and worked on drafting resolutions.
- Robin Hood Army Volunteer - Currently part of the Robin Hood Army, contributing to food distribution and community support initiatives.
- Pursued formal drawing and visual arts training
- Awarded multiple gold medals at the state level for excellence in art competitions

Hobbies

- Playing basketball
- Sketching and visual arts
- Reading books
- Watching documentaries
- Exploring new technologies
- Community service and volunteering
